source code **stack**

```
lib > mai.dart > StackExample > build
1  import 'package:flutter/material.dart';
2
3  Run | Debug | Profile
4  void main() => runApp(StackExample());
5
6  class StackExample extends StatelessWidget {
7    @override
8    Widget build(BuildContext context) {
9      return MaterialApp(
10        home: Scaffold(
11          body: Center(
12            child: Stack(
13              alignment: Alignment.center,
14              children: [
15                Container(width: 200, height: 200, color: Colors.blue),
16                Container(width: 150, height: 150, color: Colors.green),
17                Container(width: 100, height: 100, color: Colors.red),
18              ],
19            ), // Stack
20          ), // Center
21        ), // Scaffold
22      ); // MaterialApp
23    }
24  }
```

output

## Source code row

```
> main.dart > ...
1 import 'package:flutter/material.dart';
2
3 void main() => runApp(RowExample());
4
5
6
7
8 // This widget is the root of your application.
9 class RowExample extends StatelessWidget {
10   @override
